GENERAL RECORDS SCHEDULE 16

Administrative Management Records

This schedule provides for the retention or disposal of certain records relating to administrative management activities in Federal agencies. These activities involve the direction and control of those staff and management improvement programs not under line personnel directing and controlling substantive operations and programs. They exclude records of operating personnel, budget, accounting, and printing functions, which are covered by other General Records Schedules, but include records of related specialized procedural and management staffs. Included within the scope of the schedule are the most frequently found files which are created in the course of organizational planning, development and simplification of procedures, records management activities, and administration of management improvement programs. General Records Schedule 1 (items 12 and 13) provide for the disposition of case files on individuals involved in incentive award and similar types of management improvement programs. Any records created prior to January 1, 1939, must be offered to the National Archives before applying these disposition instructions.

The organizational locations and titles of administrative management units vary from agency to agency. They may be scattered at numerous levels or locations, or may be centralized. For the purposes of this schedule and nomenclature standards set forth by the Senate Committee on Government Operations in Senate Report No. 245, 80th Congress, 1st session, are followed: the first organizational level within an agency is the bureau level, subordinate components are successively division, branch, section, and unit.

This schedule is based on the presumption that management activities are carried on by a specialized person or unit with at least division-wide and usually bureau-wide or agency-wide responsibilities or by a group of such persons or units in an agency, although its provisions are applicable to exactly comparable records of agencies without such formal assignments of responsibility. Many similar or comparable records created at lower organizational levels or in field offices vary so greatly in content, value, and arrangement that they are not covered by this schedule.

Because of the nature of the activities documented by administrative management records, a relatively large proportion of them are of continuing value. Files pertaining to a management program in a well defined area, such as reports management, consist primarily of detailed case files on each form or report and for a limited period of time are of administrative importance. Files of programs covering broader and more diverse fields, such as organizational planning studies, normally consist largely of project files, which are established for each separate problem assigned for investigation; the resulting case file is usually of continuing value in documenting the history of how the agency conducted its business. either event there is a residue of ephemeral materials. These may include working papers that do not have a direct bearing on the transaction, preliminary or intermediate drafts of documents and preliminary work sheets that do not represent significant basic steps in the preparation of final drafts, letters or memoranda of transmittal and acknowledgement, routing slips, and extra copies of documents.
